

OnPoint Authority Systems — Systems Book (Master)

Version: v2026-02-17r2

Status: Working Master (Registry-Driven)

Last Updated: February 17, 2026

How to Use This Book

This Systems Book is the operating manual for building, maintaining, and distributing the **OnPoint Authority Systems** asset library (CIM + supporting artifacts) across **Website**, **Notion**, and **Word/PDF**.

Canonical Coding Standard (Used Everywhere)

Use this code format in headings, file names, Notion pages, and website slugs:

SB- - — e.g., SB-04-02-01

Rules

- ****Chapters**** are two digits: SB-00 ... SB-99
- ****Sections**** are two digits each: SB-04-02 (chapter 04, section 02)
- ****Subsections**** add another two digits: SB-04-02-01
- Codes never change once published (version-lock principle)

Table of Contents

- ****SB-00**** Master Control & Registry System
- ****SB-01**** Authority OS Overview & Architecture
- ****SB-02**** Data Room, File System, and Access Control
- ****SB-03**** CIM Program: Teaser → NDA → CIM → Buyer Deck → Appendix Pack
- ****SB-04**** Investor Readiness + Website Architecture Spec (Deal Room Digital Layer)
- ****SB-05**** Buyer Pipeline & Communications
- ****SB-06**** KPI / Metrics / Reporting
- ****SB-07**** Financial Model System
- ****SB-08**** Risk, Compliance, and Legal Pack
- ****SB-09**** Operations & Delivery System
- ****SB-10**** Product & IP System
- ****SB-11**** Tech Stack & Integrations
- ****SB-12**** HR & Org System
- ****SB-13**** Continuous Improvement, Versioning, and Change Control

*Chapters SB-05 through SB-13 are included as ****scaffolded systems**** (framework + placeholders) and are expanded as documents are finalized and locked.*

SB-00 — Master Control & Registry System

SB-00-01 Purpose & Non-Negotiables

- ****Single Source of Truth:**** One master registry governs all deliverables.
- ****Version-Locked Artifacts:**** Every outward-facing file is immutable once distributed.
- ****Auditability:**** Every send is logged (who/what/when/version).
- ****Two External Formats Only:**** Institutional (modern) + classic/print (Garamond/Times).

SB-00-02 Canonical File Naming Standard

Pattern

_____.

Example

OnPoint_CIM_External_Modern_v2026-02-17r2.pdf

SB-00-03 Registry Fields

Minimum fields for every artifact:

- Artifact_Code (e.g., CIM-01)
- System_Code (e.g., SB-03-03)
- Title
- Audience (Internal / External)
- Format (Modern / Classic)
- File_Type (DOCX / PDF / PPTX / XLSX / ZIP)
- Version
- Status (Draft / Locked / Retired)
- Owner
- Last_Updated
- Hash (optional but recommended)
- Notes

SB-01 — Authority OS Overview & Architecture

SB-01-01 Authority OS Definition

Authority OS is the documented, repeatable system that:

- 1) produces trusted materials (CIM & support pack),
- 2) governs distribution (NDA gated), and
- 3) maintains a clean version trail for buyers, bankers, and internal leadership.

SB-01-02 Layer Model

- **CEO Control Layer:** KPIs, dashboards, weekly operator cadence
- **CIM Program Layer:** Teaser → NDA → CIM → Buyer Deck → Appendix
- **Data Room Layer:** access, permissions, indexing, audit log
- **Delivery Layer:** repeatable pipeline from lead → NDA → distribution → follow-up

SB-02 — Data Room, File System, and Access Control

SB-02-01 Folder Taxonomy (Canonical)

- 00 MASTER CONTROL
- 01 CEO CONTROL LAYER
- 02 INVESTOR READINESS (CIM PROGRAM)
- 03 DATA ROOM (APPENDIX PACK)
- 04 BUYER PIPELINE
- 05 FINANCIALS
- 06 LEGAL & COMPLIANCE
- 07 OPERATIONS
- 08 TECH & PRODUCT
- 09 HR & ORG
- 99 ARCHIVE

SB-02-02 Access Control Standard

- External buyer access is ****time-bound**** and ****scope-bound****
- NDA required for any non-teaser content
- Role tiers:
 - **Internal Admin**
 - **Internal Read**
 - **Banker / Advisor**
 - **Buyer (NDA)**
 - **Buyer (Redacted / Limited)**

SB-03 — CIM Program: Teaser → NDA → CIM → Buyer Deck → Appendix Pack

SB-03-01 Canonical Deliverable Chain

- 1 **Teaser (no NDA)**
- 2 **NDA Email + NDA**
- 3 **CIM (PDF + DOCX master)**
- 4 **Buyer Deck (PPTX + PDF)**
- 5 **Appendix Pack (ZIP of exhibits / data room index)**

SB-03-02 Lock Rules

- Only **locked** versions can be sent externally.
- Any change after lock creates a **new version** and requires:
 - updated registry entry,
 - change note,
 - distribution log entry for re-send.

SB-03-03 Master vs. External Formats

- **Master:** Word DOCX (editable source of truth)
- **External:** PDF (Modern + Classic)
- **Presentation:** PPTX/PDF (Buyer Deck)

SB-04 — Investor Readiness + Website Architecture Spec (Deal Room Digital Layer)

SB-04-01 Investor Readiness: Core Proof Pack

Your digital layer must be supported by proof:

- Corporate profile + leadership bios
- KPI snapshots + recurring trend charts
- Financial model outputs (summary)
- Contracts / legal summaries (where appropriate)
- Case studies / outcomes library
- Operating cadence artifacts (weekly report, scorecards)

Output: Appendix Pack + Website content references map.

SB-04-02 Website Architecture Spec (Canonical)

This section defines the canonical structure for the **public-facing** and **NDA-gated** website layer.

It is written so it can be implemented in:

- **Website build docs** (engineering/spec)
- **Notion pages** (operating system)
- **Word** (banker-grade documentation)

SB-04-02-01 Information Architecture & Sitemap

Goals

- Communicate authority fast.
- Route qualified buyers/investors to NDA gate.
- Mirror CIM structure without exposing sensitive data.

Sitemap (Recommended)

- / Home
- /about Company + mission
- /leadership Bios + credibility
- /platform What we do / how it works
- /outcomes Case studies / results
- /metrics KPI highlights (public-safe)
- /resources Thought leadership (articles, briefs)
- /faq Buyer/investor FAQs
- /contact Contact / intake form

NDA-Gated (requires authentication)

- /data-room Gate landing page (NDA verification + access rules)
- /data-room/cim CIM download (version-locked PDF)
- /data-room/buyer-deck Buyer deck download (version-locked PDF)
- /data-room/appendix Appendix Pack download (ZIP)
- /data-room/registry “What version am I viewing?” page (read-only)
- /data-room/updates Release notes (change log per version)

Notion Mirror

Create a Notion database called **Website IA** with:

- Page slug
- Page purpose
- Owner
- Status (Draft/Approved/Live)
- Content source links (CIM sections, exhibits)
- Notes

SB-04-02-02 Page Templates & Component Rules

Template Types

- 1 ****Standard Page**** (hero + sections)
- 2 ****Landing Page**** (single CTA)
- 3 ****Index/Hub**** (lists posts or resources)
- 4 ****Gated Download Page**** (requires login)
- 5 ****Release Notes Page**** (version log)

Component Library (minimum)

- Hero (H1 + subhead + CTA)
- Credibility bar (logos, highlights)
- 3–5 benefit blocks
- Case study block
- KPI card grid (public-safe)
- CTA strip (NDA or contact)
- Footer (legal + privacy)

Design Rules

- One primary CTA per page
- Every page must map to a single “owner” and KPI
- Use system codes in the CMS (internal-only metadata): SB-04-02-xx

SB-04-02-03 Content Types, Metadata & CMS Fields

Core Content Types

- Page
- Post (blog/brief)
- CaseStudy
- MetricSnapshot
- LeadershipProfile
- DownloadAsset (gated)

Required Metadata

- title
- slug
- summary
- primary_cta
- owner
- status
- system_code (e.g., SB-04-02-03)
- last_reviewed
- version_tag (for gated downloads)

Asset Type: DownloadAsset

- asset_name
- asset_code (e.g., CIM-PDF-MOD)
- version
- audience
- format
- checksum/hash (optional)
- download_url
- notes

SB-04-02-04 Navigation Rules & UX Standards

Navigation

- Primary nav: Home, Platform, Outcomes, Metrics, Resources, About, Contact
- Secondary: FAQ, Privacy, Terms
- Gated nav appears only after authentication: Data Room, CIM, Buyer Deck, Appendix, Registry, Updates

UX Standards

- No dead ends: every page ends with a next-step CTA
- Forms must route into CRM (or at minimum, a monitored inbox)
- Gated pages must show:
 - current artifact version,
 - access expiration date,
 - “request updated version” link.

SB-04-02-05 SEO, Analytics & Tracking Plan

SEO

- Unique title + meta description per page
- Clean slug structure
- Schema where relevant (Organization, Article)
- Canonical tags for duplicated content

Analytics

Minimum events:

- Page view
- CTA click
- Form submit
- NDA request
- Gated login success/failure
- File download (CIM/Deck/Appendix) with version captured

Tracking Field Standard

event_name, page_slug, system_code, asset_code, version, user_id (if gated)

SB-04-02-06 Publishing Workflow & Governance

Workflow (recommended)

- 1 Draft (writer/owner)
- 2 Review (CEO or designated approver)
- 3 Compliance/Legal review (if needed)
- 4 Publish (web admin)
- 5 Log release (registry + release notes)
- 6 Monitor (analytics + form inbox)

Governance

- Weekly review cadence for lead flow + site KPIs
- Monthly content review (resources library)
- Quarterly architecture review (sitemap + conversions)

SB-04-02-07 Version Tagging, Release Notes & Locking

Version Tagging

- Website releases: WEB-v2026-02-17r2
- Gated assets inherit artifact versions (e.g., CIM-v2026-02-17r2)

Release Notes Rules

- Every change that affects buyers/investors gets a note:
 - date,
 - what changed,
 - why,
 - which artifacts/pages,
 - who approved.

Locking

- Public pages can evolve continuously.
- Gated artifacts are immutable once distributed (new version required for changes).

SB-04-02-08 QA, Accessibility, Security, Performance

QA

- Link checks (no 404s)
- Form tests (end-to-end delivery)
- Gated flow tests (login + permissions)
- Download integrity (correct version files)

Accessibility

- Heading structure (H1 once per page)
- Alt text for images
- Contrast checks
- Keyboard navigation

Security

- NDA gate authentication required for sensitive downloads
- Time-bound links where possible
- Audit log for downloads
- Admin actions logged (publish/unpublish)

Performance

- Lighthouse targets (mobile-first)
- Image compression + lazy loading
- Caching rules (public pages)
- Secure file hosting for gated downloads

SB-04-03 Website ↔ CIM Mapping Table (Starter)

Create a mapping table (Notion database or spreadsheet):

- Website_Page
- System_Code
- CIM_Section
- Public_Safe? (Y/N)
- Source_File
- Owner
- Last_Reviewed

SB-05 — Buyer Pipeline & Communications (Scaffold)

SB-05-01 Pipeline Stages

Lead → Qualified → NDA Sent → NDA Signed → CIM Delivered → Follow-Up → LOI → Diligence → Close

SB-05-02 Standard Comms Library

- NDA email templates
- Follow-up cadence (Day 1 / Day 3 / Day 7 / weekly)
- Objection handling scripts

SB-06 — KPI / Metrics / Reporting (Scaffold)

- CEO weekly scorecard
- Ops KPIs
- Sales pipeline KPIs
- Website conversion KPIs

SB-13 — Continuous Improvement, Versioning, and Change Control (Scaffold)

SB-13-01 Change Control

- Any external change requires new version + registry update
- Internal changes follow weekly release cadence

SB-13-02 Retirements

- Retired artifacts remain in 99 ARCHIVE with “RET” tag
- Do not delete; preserve audit trail

Appendix A — Quick Copy Blocks

A-01 System Code Tag (copy/paste)

SB-04-02-05 | SEO, Analytics & Tracking Plan | WEB-v2026-02-17r2

A-02 Gated Download Page Banner (copy/paste)
